

THERMOLEC

Electric Boilers

The Latest In Technology for Hydronic Heating

Thermolec electric boilers are designed to work with in-floor radiant and hot water baseboard and radiator heating systems. A Thermolec electric boiler lets you take advantage of low electric heating rates offered by many electric coops. These low rates can significantly reduce monthly heating bills compared to natural gas, propane and fuel oil. Thermolec electric boilers are ideal for new construction or retrofit, are 100% efficient, offer lower total installed cost versus gas boilers and provide many years of quiet and safe operation.

Thermolec Electric Boilers Offer You...

- Unsurpassed Comfort
- 100% Efficiency
- Low Operating Cost
- Lower Installed Cost
- Clean Operation
- Safe Performance
- Long Life

Thermolec Electric Boiler Features

Thermolec boilers are ideal for all types of radiant heating systems; floor, baseboard or radiator. From heating your entire home or for specific areas like basements, bathrooms and garages, Thermolec offers a wide range of boiler sizes to fit all your specific radiant heating needs. Thermolec electric boilers incorporate state of the art technology for maximum efficiency and precise temperature control for the ultimate in heating comfort. Your savings will "radiate" when you choose a reliable, safe and efficient Thermolec electric boiler.

Wide Range of kW Sizes Available

- Range from 5 - 40 kW (17,000 – 136,500 BTUH)

High-grade stainless steel heat generator tank

- Corrosion resistant for longer life

Built-in dual fuel control

- Automatically switches to fossil fuel back-up with utility load control or can be switched manually

Circuit breakers included

- Provides safe electrical isolation

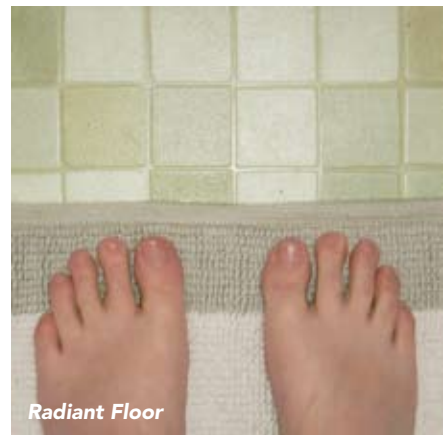

Limited Warranty

- 10 years on elements and tank, 2 years on all other components

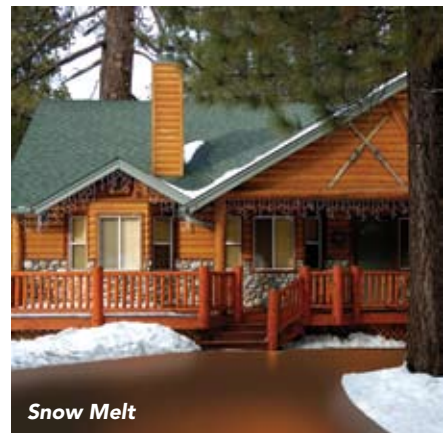

Distributed By:

Baseboard/Radiator

Radiant Floor

Snow Melt

Dimensions

5 - 23 kW: 18" x 18" x 9.5"

27 - 40 kW: 18" x 28" x 9.5"
